Campaign Spending: [List of Filers](#)

Your concerned about how your paycheck keeps getting smaller, transportation keeps getting worse, and roads in disrepair. Violent crimes are up with the latest rounds of murders on Oahu sending chills down our necks. Many of the crimes are related to drugs; a scourge of Hawaii.

While statistics show improvement in public education, we still have a long way to go before we are consistently on top.

I am not in favor of a light rail because of open-ended costs and the minimal impact on reducing traffic congestion. I encourage the re-engineering of the H1/H2 Interchange, constructing an elevated hybrid freeway, re-engineering Farrington Hwy H-1 to Nanakuli, and constructing an off-ramp toward Waianae at the Makakilo Interchange.

I favor reducing state taxes, eliminating Excise Taxes on drugs, food and clothing. I support discontinuing non-productive programs and transferring those funds and employees to programs that are productive.

I am in favor of constructing a State Prison, a mandatory life sentence for persons who sell or profit from selling drugs to minors, and enacting and enforcing comprehensive school safety and security laws.

I favor hiring more qualified teachers, capitol construction program funds to replace aging school buildings, providing students with textbooks, and advancing technology in our schools. I support bottom up budgeting, establishment of District School Boards, and restructuring the Board of Education.

Let us begin by "Embracing Traditions and Shaping the Future. Mahalo nui loa for your support and vote.
